## **MEC – CARE AND MAINTENANCE**

Q1. How to do portable air conditioner maintenance for :-

- a. *iPort G12000 PR1C 1.5HP and*
- b. *iPort G9000 PR1C 1.5HP?*

### **IMPORTANT**

- A1.1 Be sure to unplug the unit before cleaning or servicing.
- A1.2 Do not use gasoline, thinner or other chemicals to clean the unit.
- A1.3 Do not wash the unit directly under a tap or using a hose. It may cause electrical danger.
- A1.4 If the power cord is damaged, it should be repaired by manufacture or its agency.

### **1. Air filter**

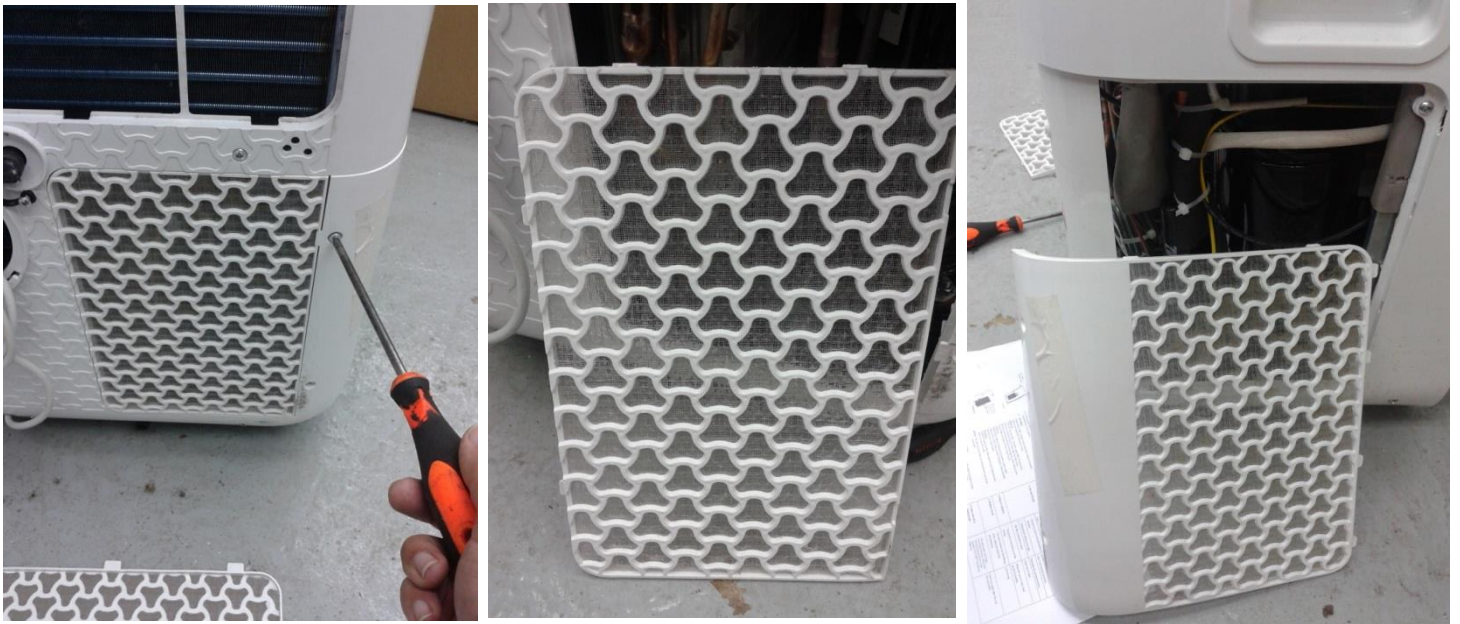

Clean the air filter at least once every two weeks to prevent inferior fan operation because of dust.

### **Removal**

- a. This unit has two filters. Take the upper filter out along the arrow direction.

b. Remove the lower filter by loosening the screw, taking down the air filter as below

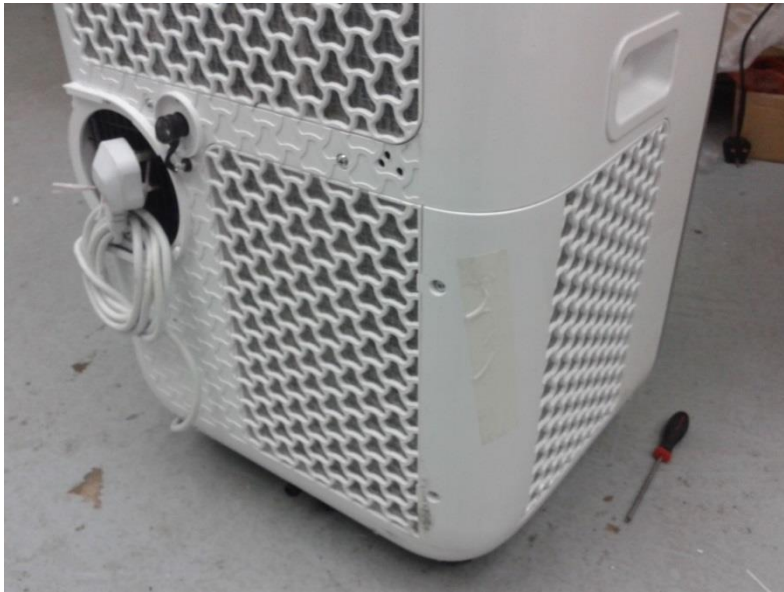

### **Cleaning**

c. Wash the air filter by immersing it gently in warm water, (about 40OC/104OF) with a neutral detergent. Rinse the filter and dry it in a shady place.

## **Mounting**

d. Install the upper air filter after cleaning and install the lower filter by using the screw driver.

**NOTE: The grill and the air filter are connected and cannot be separated.**

### **2. Unit enclosure**

Use a lint-free cloth soaked with neutral detergent to clean the unit enclosure.

Finished by a dry clean cloth.

*Note: If the matter as mentioned above still exist, please call to Service Centre for further assistance.*
